

Dear customers and potential customers,

Autumn and Winter annually provide us with some quiet time for **new ideas and concepts**.

Thus, placing a real **Frauscher 717 GT in front of the famous „Löwen“** wine bar and vinotheque in Kreuzlingen during the Christmas season turned out to be a real winner.

Another high point in December was that the **Chaparral brand** once again became a valuable part of our portfolio. Check out our **currently hot deals** of:

www.krueger-werft.ch/en_boote.

As a special service, we have expanded our website with links to our partners in **distribution, technology and hospitality**.

An **updated website** of www.krueger-werft as well as our newsletter, will be provided with the change of the seasons.

We wish you a great start to the New Year with many happy times.

Your Krüger Werft Team

Chaparral back on bord

Founded in 1965 in Georgia, USA, **Chaparral Boats** is world-famous for its crafts between **18 ft and 42 ft length** in the fields of leisure, sport boats, motorboats and motor yachts. The shipyard is still „piloted“ by the founder and his partner.

Chaparral enjoys an **reputation of excellence** in yachting circles and has a **very sound commercial base**.

Its success can be traced directly to its extraordinary **innovative capabilities**. **Since 1981**, the company has won **more than 40 awards**. It has been awarded the prestigious „Boat of the year Award“ twelve times. The shipyard is proud to have earned a **high level of satisfaction**, frequently expressed by its customers.

We are looking forward to present **the significantly expanded Chaparral range of crafts at our show in Spring.**

Winter time is shop time for Markus Auer

The trained mechanic of agricultural and construction machines has been employed by Krüger Werft since 2009.

His Winter schedule comprises mostly **maintenance and repair work on workshop equipment and company vehicles.** „They too need care and are frequently neglected in the busy Summer time.“ In addition to his usual activities on the boats' mechanical systems, Markus Auer is also responsible for custom-built boats, including **design, steel processing - also in combination with wood** – as well as hydraulic and electrical systems. Boat technology is particular fascinating to him. Hence, he has continued his training by adding **boat engine diagnostics** to his other accomplishments.

He enjoys the working environment at the shipyard as part of **a very friendly team.** Even his hobbies are closely related to his professional activities. He loves tinkering with old cars, riding motorbikes and carpentry. All this is forgotten, however, during the „Fasnacht“, the Swiss carnival time with traditional costumes and masks, parades and dances. In between, he enjoys his daily runs.

A motorboat with more than 7 meters overall length took centre stage in front of the reopened „Löwen“ wine bar in Kreuzlingen.

We placed **a Frauscher 717 GT for the entire Christmas season** at the intersection of Hauptstrasse and Löwenstrasse. The spectacularly illuminated boat was one of the focal points of the Christmas lights that enhanced the newly designed Hauptstrasse area. This elegant **„Powerboat of the year 2010“** directed one's view towards the heritage-listed walls of the „Löwen“ house which was reopened last November. The interior of this renovated architectural treasure is as elegant and smart as the boat in front of it: the wine bar on the ground floor and the vinotheque in the cellars are well worth a visit.

Company outing to the „autobau“ in Romanshorn - because engines are our life

The destination of this year's Company outing was the „autobau“ in Romanshorn. Behind the walls of these historical industrial buildings at the shores of Lake Constance, high-proof alcohol beverages were produced and stored for more than a century. Today, these halls house **fabulous vehicles from a variety of eras.**

After admiring the treasures in the diversely-themed exhibition halls, we enjoyed a leisurely dinner before calling it a day.
