

Apremare 64 Fly

Apremare reinvents the traditional Gozzo again, this time not in a so big way as it did in its glorious past, but by offering a flybridge version to its 64 feet model. Obviously this new 64 feet Fly, keeps the excellent layout of the standard version 64, flagship of the Gozzo range and a redevelopment of the Apremare 60.

Distinct features of this model are the bow area with the much appreciated U-shaped sofa, and the stern area, which is the project's key point, thanks to its unique design which from a relaxing settee transforms into a sundeck, blending perfectly with the lines of the hull.

Hallmark of the 64 Fly, is obviously represented by the added flybridge, with its second helm station to port, a c-shaped settee to starboard and a two person sun lounger looking aft.

Below we have the marvelous 3 cabin 3 head layout with an aft crew cabin, and spacious full beam owners cabin which also features a spacious relaxing bath tub.

The materials used for the furniture are extremely natural and classic, with a predominance of shiny and matt mahogany, Viennese straw and mirrored, chrome plated and steel hardware.

Technical Data:

LOA	19.4 m (63.8 ft)
Length Hull	19.36 m
Length Waterline	14.69 m loaded
Beam	5.60 m
Displacement	34.9 t loaded, 29.5 empty and dry
